# J70 FORMWORK BEAMS - PRO

## WHY J70 Plastic LVL ?

1) Unmatched Durability: our Plastic Coated LVL will never decay, ensuring long-term reliability and reduced maintenance costs.

2) Dimensional Stability: It remains unaffected by seasonal changes, resisting shrinkage during summer or dry weather. This stability prevents bending of the pipes, maintaining the integrity of your formwork structures.

3) Pest and Fungus Resistance: Our product is 100% resistant to termites, fungus, and borers, safeguarding your investment against common threats that degrade wooden materials.
